Drawings

1. Figs. 10A, 10B, 11 and 12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim and Specification Objections

2. It would appear that every occurrence of the word "field" (as in field effect transistor) is misspelled. See claim 1 line 2, for example. The claims and specification should be revised accordingly.

Ex parte Quayle

3. This application is in condition for allowance except for the following formal matters noted above.

The Prior Art does not appear to disclose a switch comprising a series of FETs and a protecting element comprising an insulating region disposed between two high impurity concentration regions wherein the protecting element is connected between an input of the switch (source or drain of a first FET in the series) and a control terminal of

the switch (gate of the first FET) or between an output of the switch (source or drain of a last FET in the series) and the control terminal of the switch (gate of the last FET) as recited in claims 1, 2 and 10.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
